Machine Learning: The High-Interest Credit Card or Technical Debt

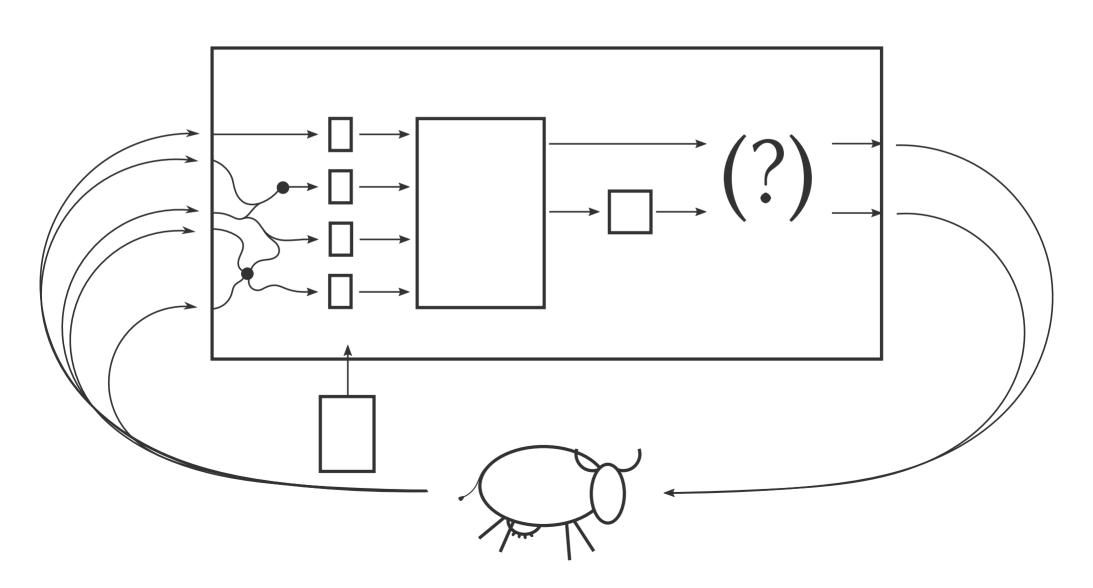

Sculley et al. 2014

Robert Różański, MLGdańsk 29.01.2018

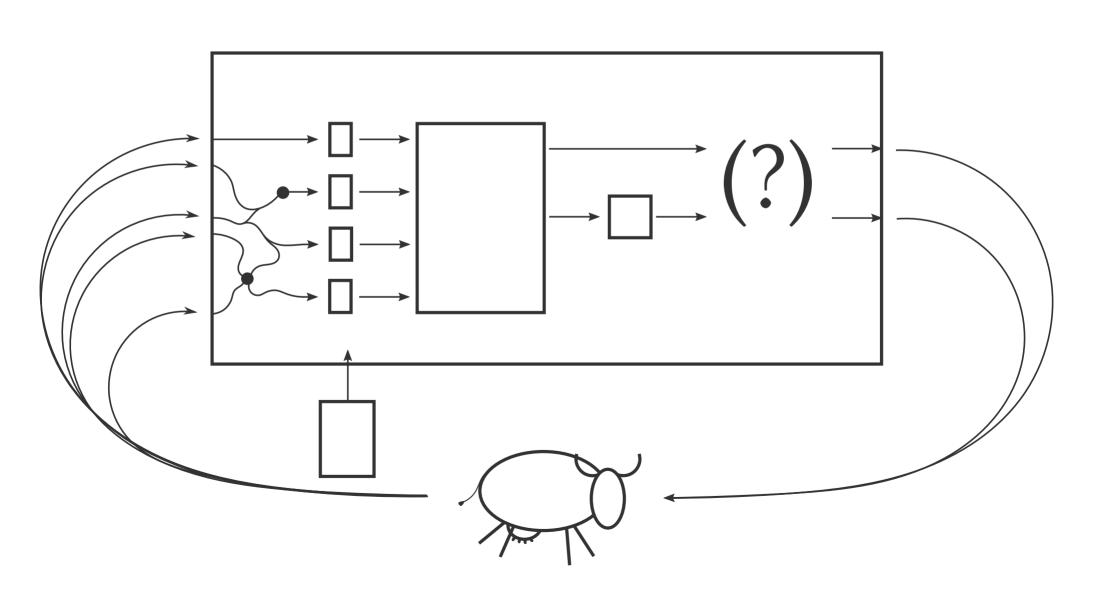

ML system

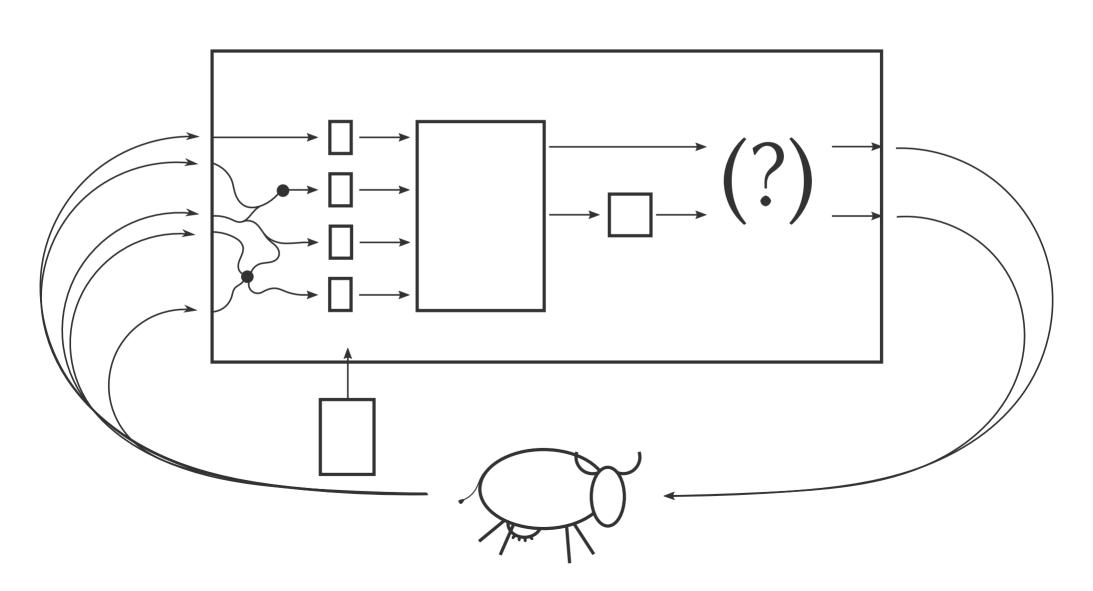

1. ML erodes boundaries:

- 1. ML erodes boundaries:
- 1.1 Entanglement (CACE)

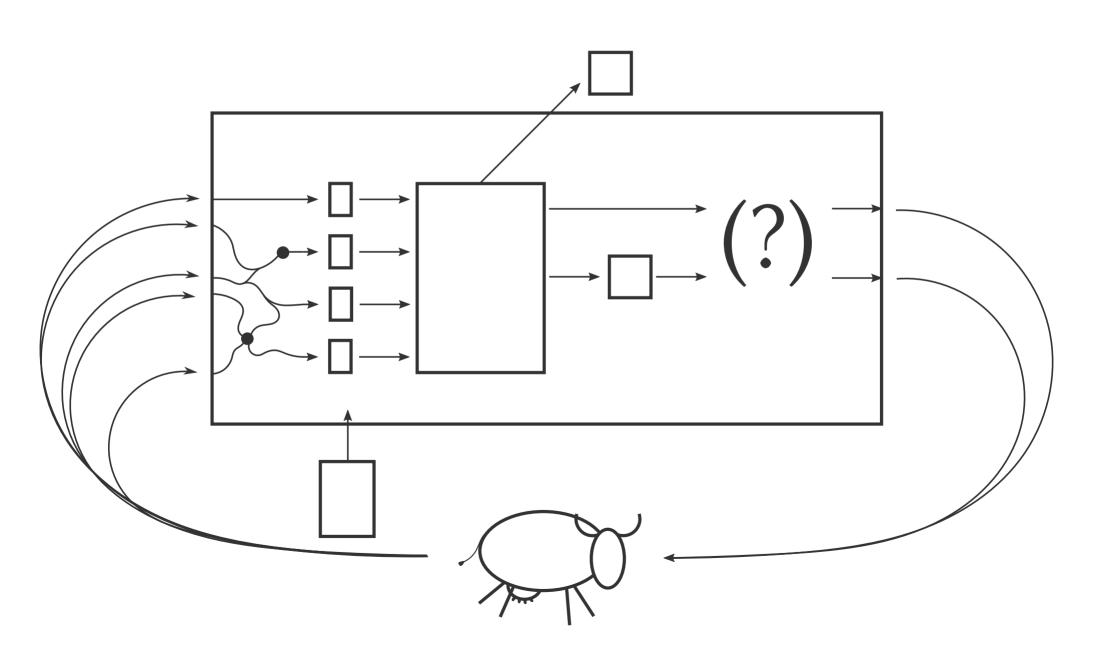

- 1. ML erodes boundaries:
- 1.2 Hidden feedback loops

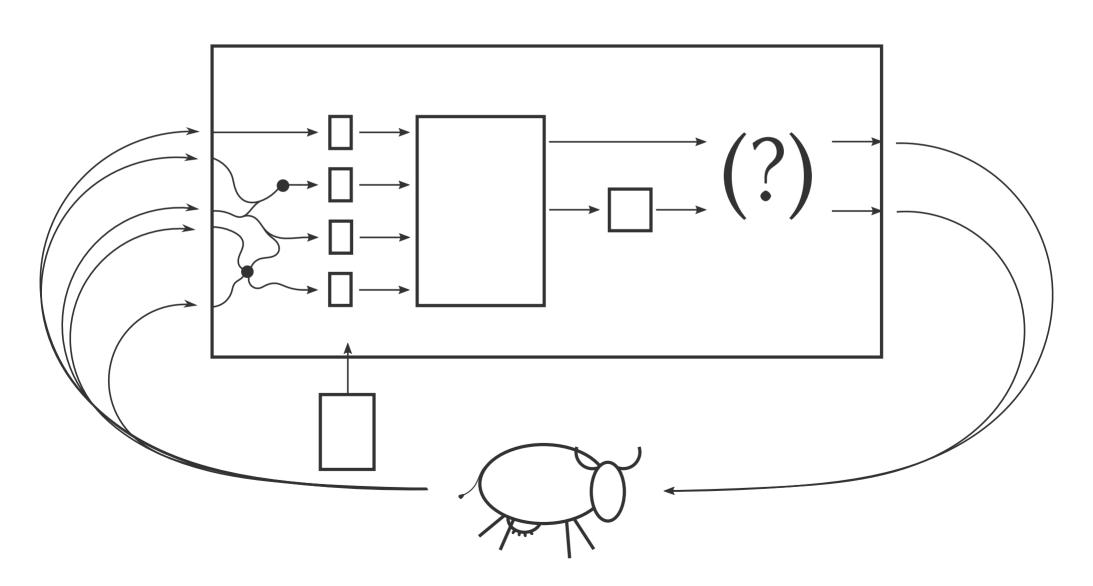

1. ML erodes boundaries:

1.3 Undeclared consumers

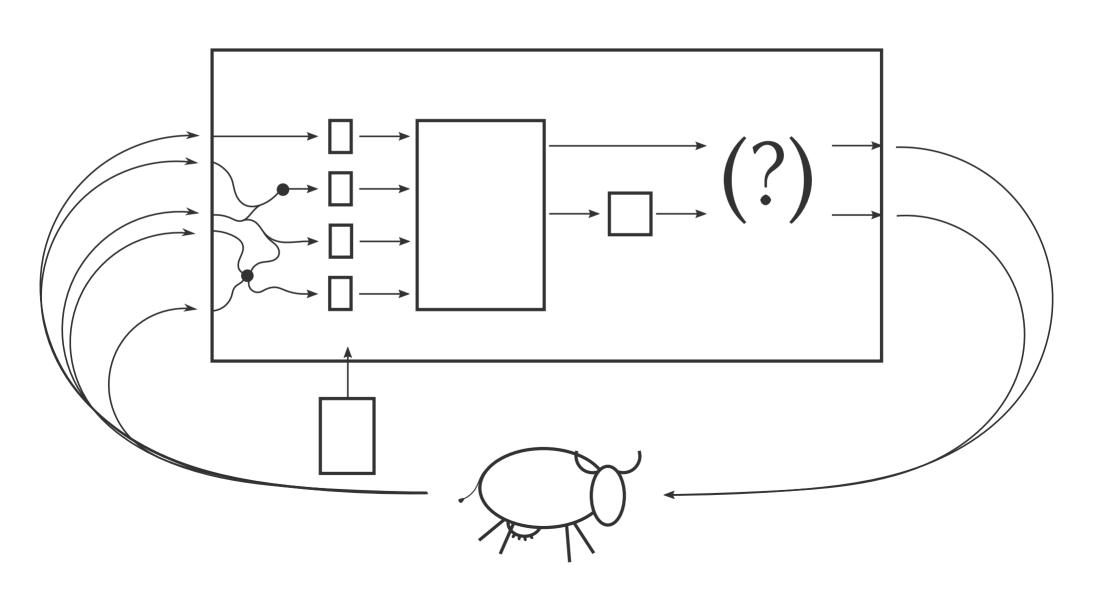

2. Data dependencies:

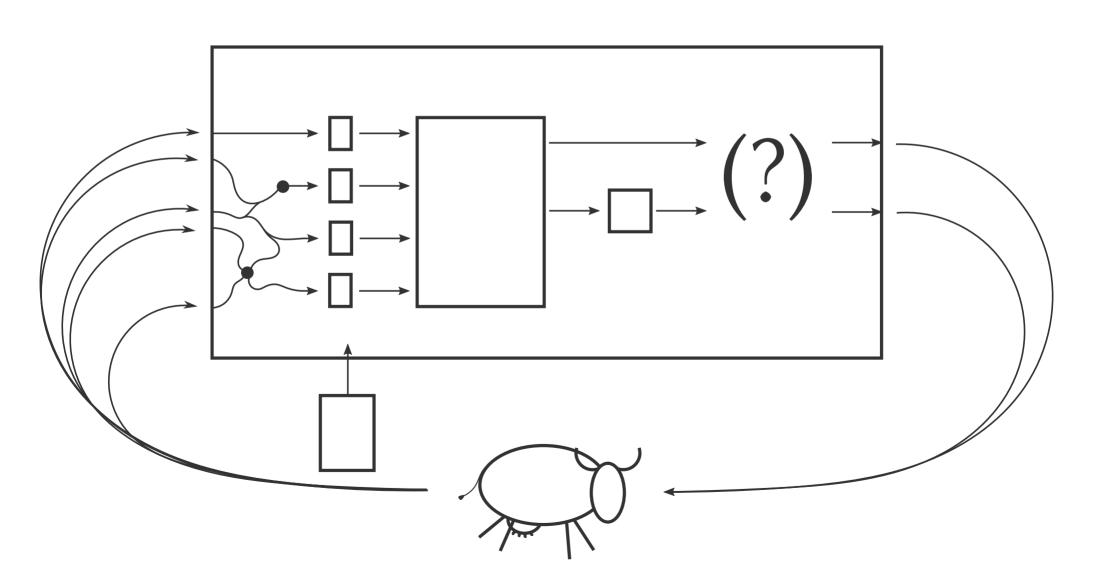

2. Data dependencies:

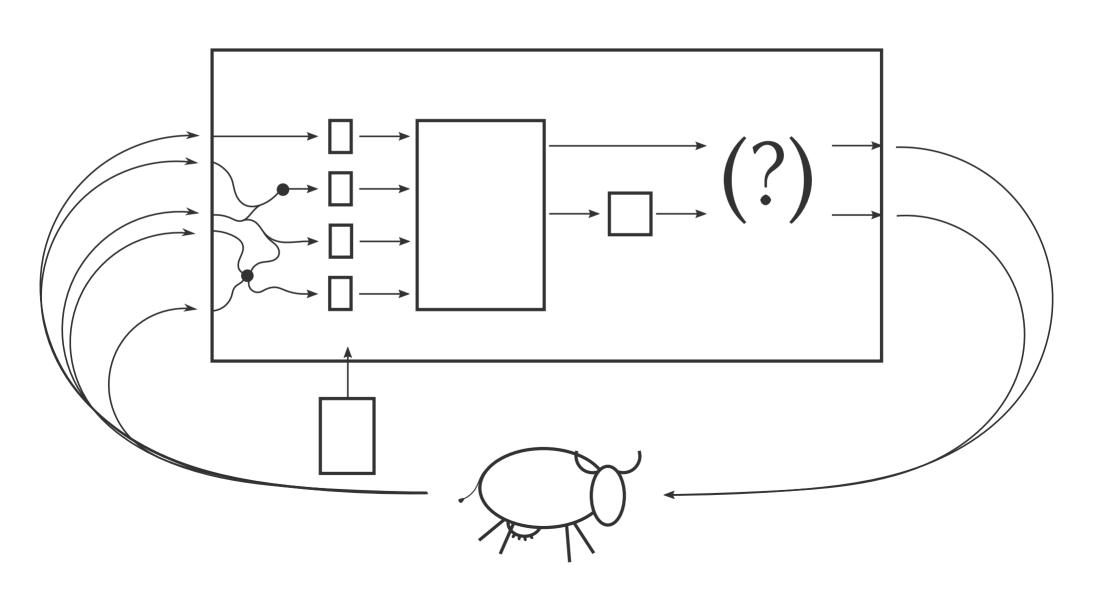

2.1 Unstable data dependencies

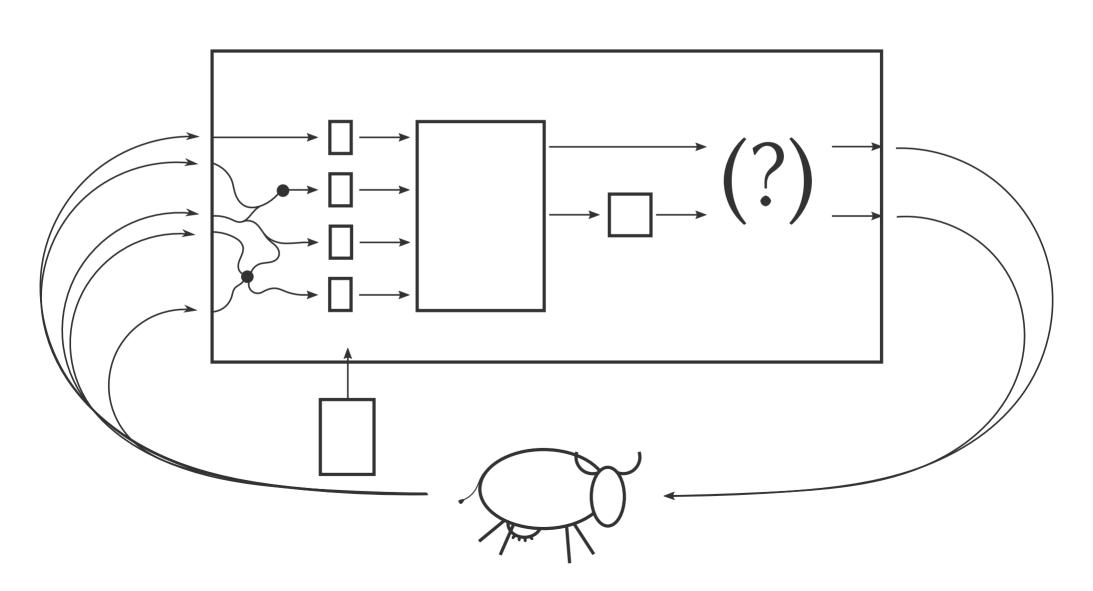

2. Data dependencies:2.2 Underutilised data dependencies

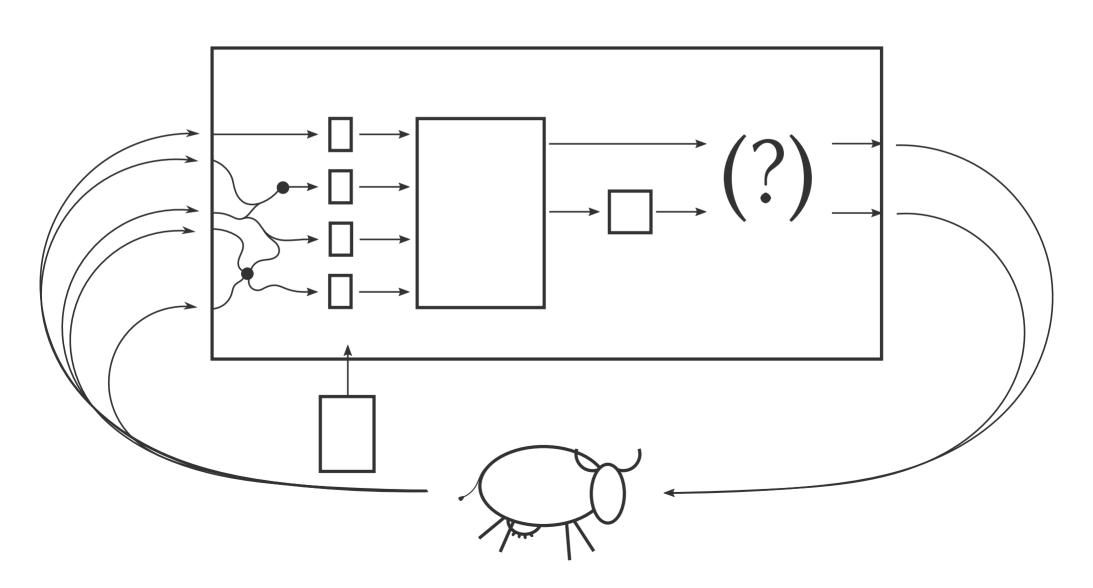

3 System-Ivl spaghetti:

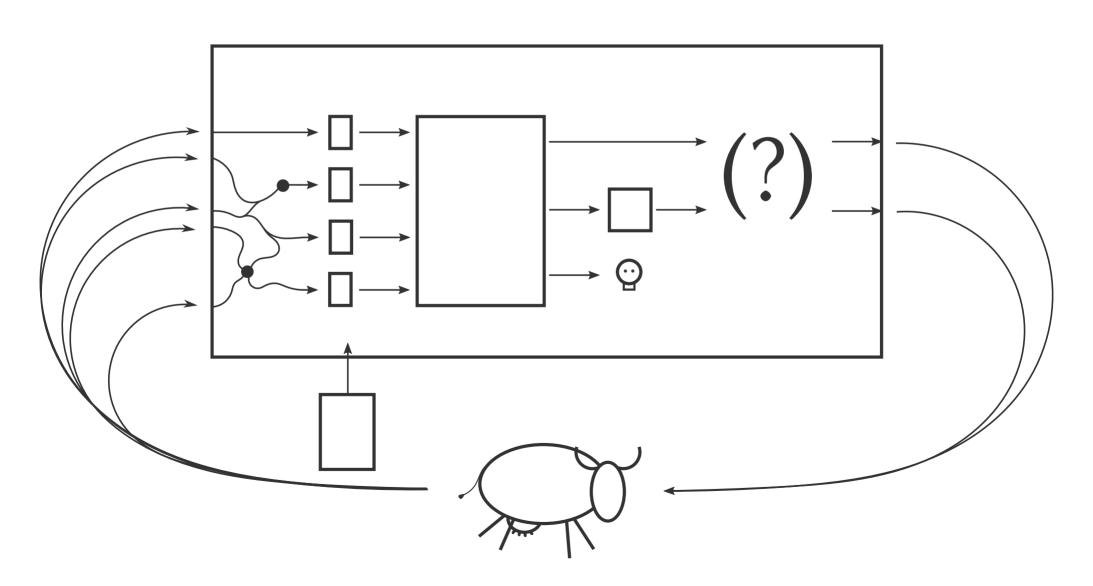

3 System-Ivl spaghetti: 3.1 glue code

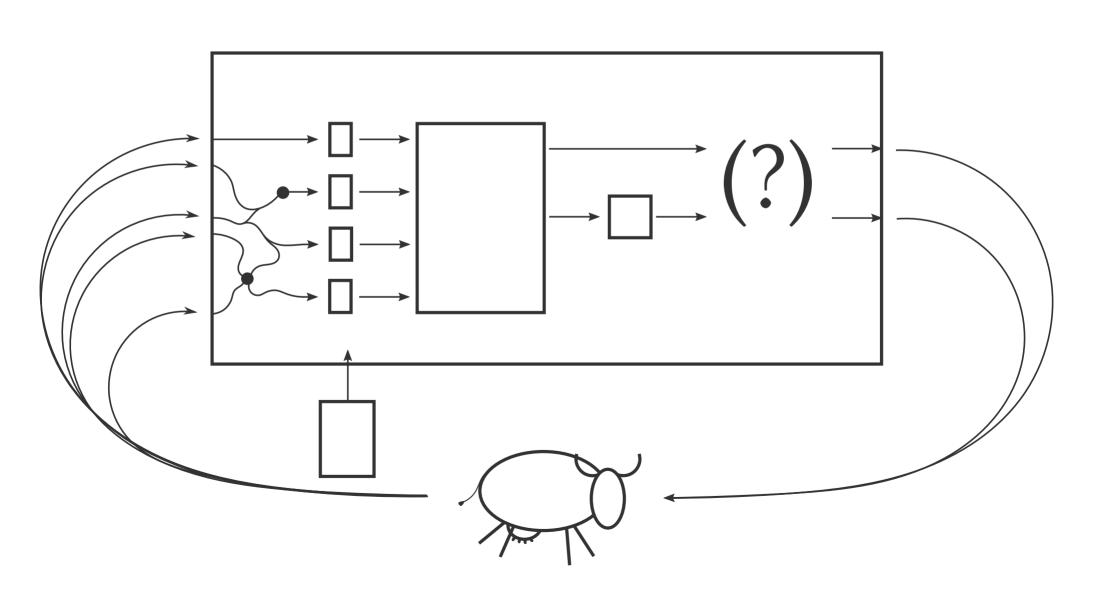

3 System-Ivl spaghetti:3.2 pipeline jungles

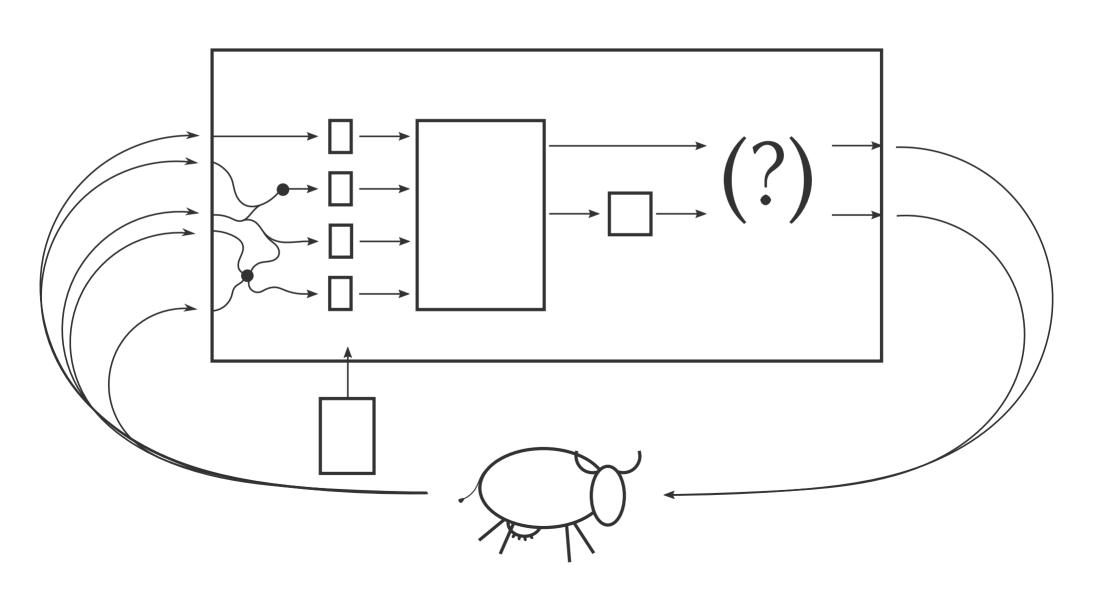

3 System-Ivl spaghetti 3.3 dead experimental codepaths

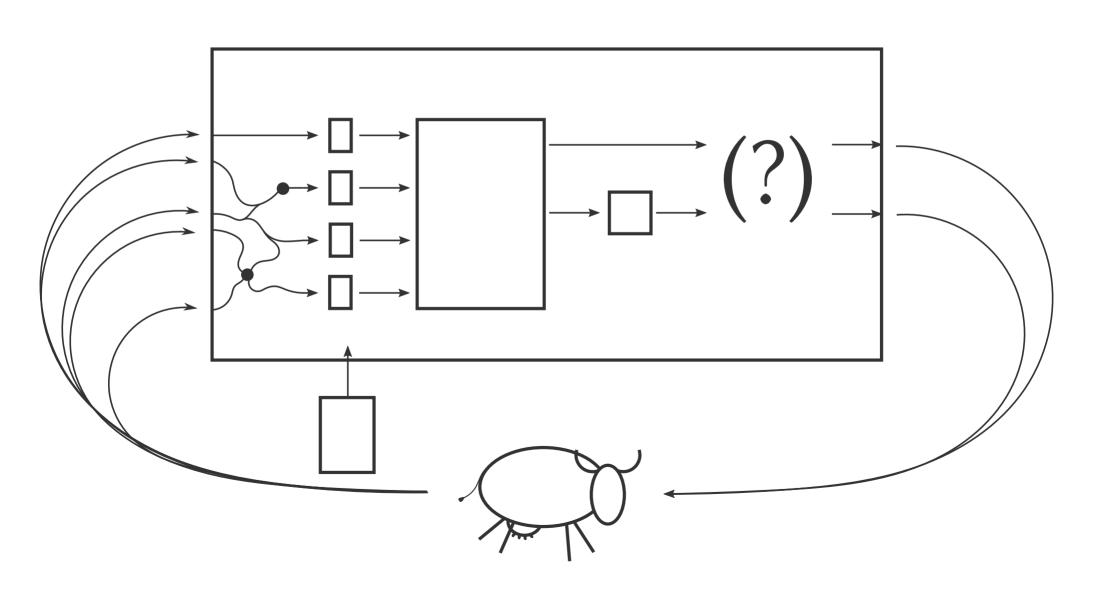

3 System-Ivl spaghetti:3.4 configuration debt

4 Changes in the external world:

4 Changes in the external world:4.1 fixed thresholds

4 Changes in the external world:4.2 Outdated correlations
